BULBS FOR AUTUMN PLANTING, IN AND OUT OF DOORS.

FREE BULBS.—Extra bulbs will be given free to customers whose purchases amount to 25 cents and over.

Every home should have a large or small bed of Hyacinths, Tulips, Narcissus, Crocus, etc. Their beauty and colors give a home-like and cheerful appearance. Our bulbs are imported direct by us from the best growers in Europe, and we guarantee them to be as fine as any sold in America. Our prices will be the lowest.

Directions for Cultivating and Forcing for Spring and Winter Blooming.—To have this class of bulbs in perfection early in spring, plant from latter part of September up to last of December, in deep rich soil; just before severe cold weather sets in, cover with a coating of well

decomposed manure, which remove gradually early in the spring and loosen the soil. Top of bulb should be from two to four inches below the surface of the ground, according to its size.

To Force Hyacinths for Blooming In-doors in Pots.—Plant in light, rich, sandy soil and leave one-third of the bulb above the soil; keep them in a cool place and covered up for about four to six weeks, then bring them into a warm place and give plenty of air and light. For Tulips and Narcissus follow same directions. The great secret of forcing bulbs advantageously is to keep them cool and dark until they have formed strong and sufficient roots. Water occasionally and keep the soil on top loose. For lillies the same directions apply, but they should be forced slowly.
